Anatoliy D. Zaslavskiy - Full Stack JS Coder

347-882-9902 | toli@tolicodes.com | http://linkedin.com/in/tolicodes

I am a solutions engineer with a 8+ year development background in *enterprise software frontends, UX,* and *data visualization*. I am looking for a new challenge where I can explore solutions engineering more deeply.

Work Experience

HOVER, Senior Frontend Developer   **Feb 2018-Present**
- Developed complex platform for calculating building material needed for construction and visualizing houses with different materials

Technologies: React, Redux, Styled Components, Jest, Redux Sagas

Smartly, Solutions Engineer/Tech Account Manager   **Jul 2017-Sep 2017**
- Provided technical solutions for high value clients, writing detailed reports on optimization strategies for their campaigns
- Scripted in Node.js to provide reporting solutions using Smartly, Google Data Studio, AirTables, and integrating multiple data sources

Technologies: Facebook Ads Platform, React, Node.js Scripting

Oselot, Owner (Freelance/Consulting)   **Jun 2015-Present**
- CLIENTS: American Express, Even Financial, 0ptimus, Respondent.io, WSJ, NY Fed
- Programmed, project managed, and led teams for multiple companies including Amex (OPEN application process), Even Financial (client facing calculators and large administrative backend in Angular), and 0ptimus (political campaign data visualizations).
- Building pitch decks, participating in client and investor meetings, wireframing, process diagrams, writing functional specifications
- Mentoring startups on CodeMentor (see my reviews!)

Technologies: Backbone.js, Node.js, JIRA, LucidCharts, Baslamiq, Confluence, Drone.io, Require.js, Grunt, Bower, MongoDB, Amazon AWS

Agorafy, Frontend Team Lead   **Aug 2016-Apr 2017**
- Programmed, architected, and managed frontend team in relaunch of Agorafy.com, a real estate listings platform
- Participated in product and planning meetings with designers, product owners, and other stakeholders
- Wrote technical product specifications and managed sprints for the frontend team

Technologies: React.js, JIRA, Moqups, Confluence, Redux, Amazon AWS

Percolate, Frontend Developer   **Oct 2014-Jun 2015**
- Backbone.js developer, worked on a 1500+ JS file enterprise marketing application used by large enterprises such as Amex and Coke
- Interacted with Facebook, Twitter, Tumblr, LinkedIn, Marketo, Pinterest, and other social media APIs
- Built an intuitive WYSIWYG email editor that takes a new approach to designing email marketing campaigns

Technologies: Backbone.js, Require, Node.js, Grunt.js, React.js

New York Federal Reserve, Frontend Developer   **Apr 2013-Apr 2014**
- Backbone.js expert, worked on mission critical projects that provided reporting/management interfaces for Treasury and Fed operations
- Wrote framework for handling client side and server side validation, creating complex form elements, interactive excel-style data tables, handling security, view management, and more
- Pioneer Node.js, MongoDB, D3, and other data viz tools in the bank

Technologies: Backbone.js, Require, Backgrid, Backbone.Forms, D3, Raphael, Node.js, XML, jQuery, MongoDB

Wall Street Journal, Interactives Developer   **Aug 2012-Mar 2013**
- Used D3.js, HighCharts.js, and Node.js. to create interactive graphics in a fast-paced newsroom environment
- Aggregated data and requirement by working closely with reporters, editors, and project managers

Technologies: Node.js, D3.js, HighCharts, GitHub, Confluence, MVCs (Backbone.js), Node.js, MySQL, MongoDB

Volunteer Work
- Team Logistics Coordinator on the Leadership Team OpenCamps (conference at the UN & Javitz center) - organizing 170 volunteers and 7000 attendees
- Volunteering at ScriptEd teaching code to high school students at The Urban Assembly for Law and Justice
